

Mind, Brain, and Education: Insights from an Emerging Field

Speaker: Zachary Stein, Ed.M.,
{Colleague of **Howard Gardner** and **Kurt Fischer**}

WED., MAR. 25th, 4pm in B207

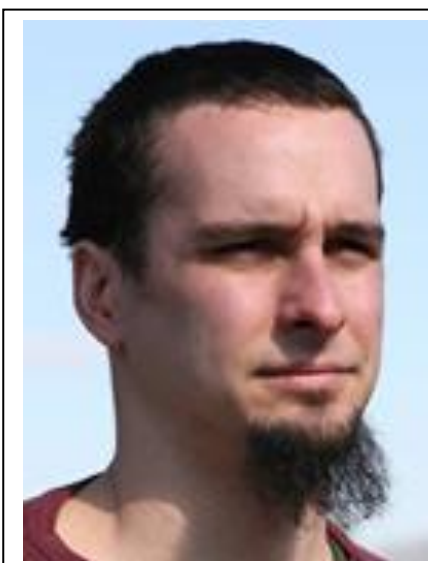

Join us for an engaging presentation that touches upon the following topics:

- Dyslexia, the brain, and the genetics learning differences
- The cognitive neuroscience of emotion
- Recent important advances in developmental psychology
- Action research and research schools
- The dangers of strictly brain-based approaches to education

Zachary Stein, Ed.M.

Doctoral candidate Harvard University Graduate School of Education;
Senior Analyst, Developmental Testing Service, LCC.

Zachary Stein received a B.A. in philosophy from Hampshire College in 2004 and an Ed.M. in Mind, Brain, and Education from the Harvard University Graduate School of Education in 2006. He is currently a student of philosophy and cognitive development pursuing his doctorate at Harvard. He also works for a research and testing group involved in the reform of standardized testing.

*In recent years he has published in a variety of outlets and with a variety of co-authors—including **Howard Gardner** and **Kurt Fischer**—on issues ranging from cognitive development and pedagogy to philosophy of education and interdisciplinarity. He also has experience lecturing to a variety of audiences, in public and higher education, the academy, federal government, and industry.*
